Define Problem Statements (Customer Problem Statement Template):

Many patients are readmitted to hospital shortly after discharge, leading to increased healthcare costs and decreased quality of life for patients. This project aims to develop a machine learning model that can accurately predict which patients are at risk of being readmitted within a specified time frame after their initial discharge. By identifying these high-risk patients, healthcare providers can intervene early with appropriate interventions to reduce readmission rates and improve patients' outcomes.

| Customer Problem Statement Template | | | | |
|-------------------------------------|--|-----------------------------|------------------------------|--|
| I am | I'm trying to | But | Because | Which makes me feel |
| Patient | address the issue of hospital readmissions, | I'm encountering challenges | there are underlying factors | the current strategies aren't effectively reducing readmission rates." |
| A female patient | tackle the problem of hospital readmissions, | I'm encountering obstacles | there are certain factors | the existing interventions fail to adequately address the unique needs and circumstances faced by women in preventing readmissions." |

| Problem Statement (PS) | I am (Customer) | I'm trying to | But | Because | Which makes me feel |
|------------------------|------------------|---|-----------------------------|------------------------------|--|
| PS-1 | Patient | address the issue of hospital readmissions , | I'm encountering challenges | there are underlying factors | the current strategies aren't effectively reducing readmission rates." |
| PS-2 | A female patient | tackle the problem of hospital readmissions , | I'm encountering obstacles | there are certain factors | the existing interventions fail to adequately address the unique needs and circumstances faced by women in preventing readmissions." |
